

Sri Lanka's Tea Production of 15.6 Mkgs recorded for the month of February, 2025 reflects a decline of approx. 4.5 Mkgs (22.3%) when compared to the corresponding month of 2024. All Three elevations have recorded crop losses due to climate change that was prevalent during the month under review. During the cumulative period January/ February, 2025, a total crop of approx. 37.2 Mkgs was harvested as against approx. 38.6 Mkgs achieved during the corresponding period of last year which recorded a loss of approx. 1.5Mkgs(4%). Past records indicate that crops harvested during the months of April and May, 2024, the deficit is reducing whilst in June, July and August, 2024, we can see a significant change on a positive note subject to favourable weather conditions. Hence, we are confident that the current loss during the first quarter of 2025 could be accomplished for the benefit of producers during the 02nd quarter.

Given below are more comprehensive details relating to tea production.
